In-House Branding & Tailoring

Not only is our product range huge, but we also offer in-house artwork design, heat seal and embroidery departments. Artwork creation is free of charge and we have no minimum order, made possible by being in total control of any branding requirement. We also have a fully functioning, in-house tailoring department which is a huge benefit to our clients.

Rapid Deliveries

Because we are in complete control of our garment decoration we can turn around orders very quickly so if the need arises speak with your account manager and you may be surprised how quickly we can get our orders delivered.

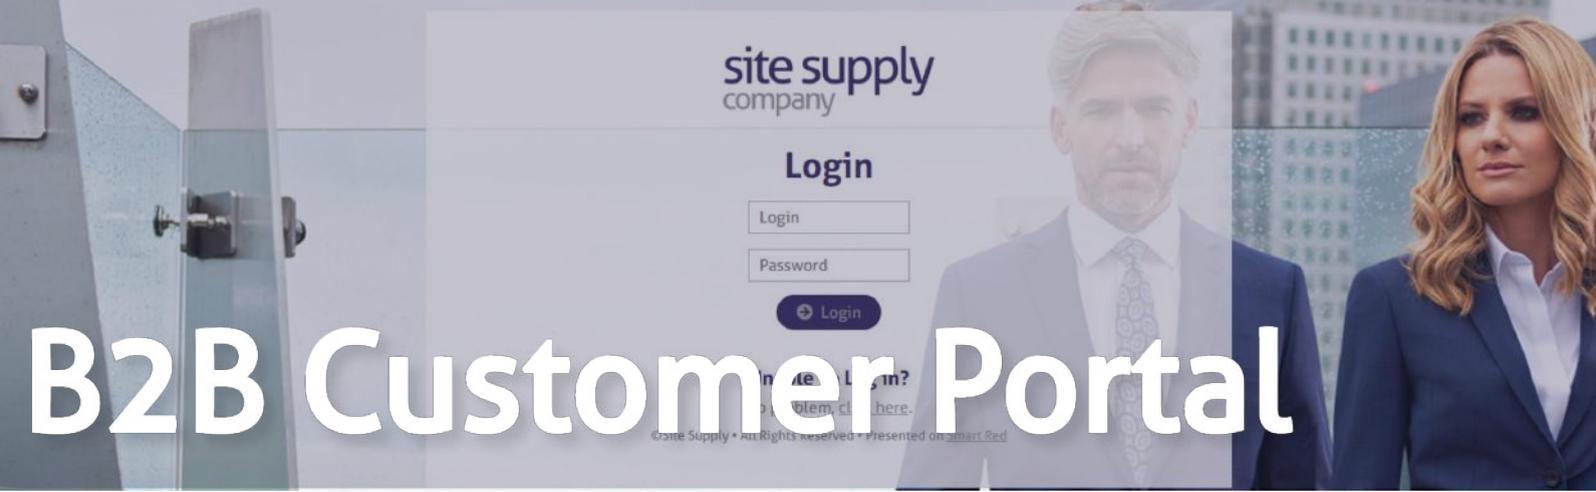

Training

We are able to provide various types of on-site training, surveys and testing to complement our products, such as Face Fit Testing, Sign Surveys and much more. Your account manager would be pleased to discuss any requirement with you.

Modern Thinking

We are a very modern thinking company, embracing modern technology to enhance our business, and in turn the operations of our customers.

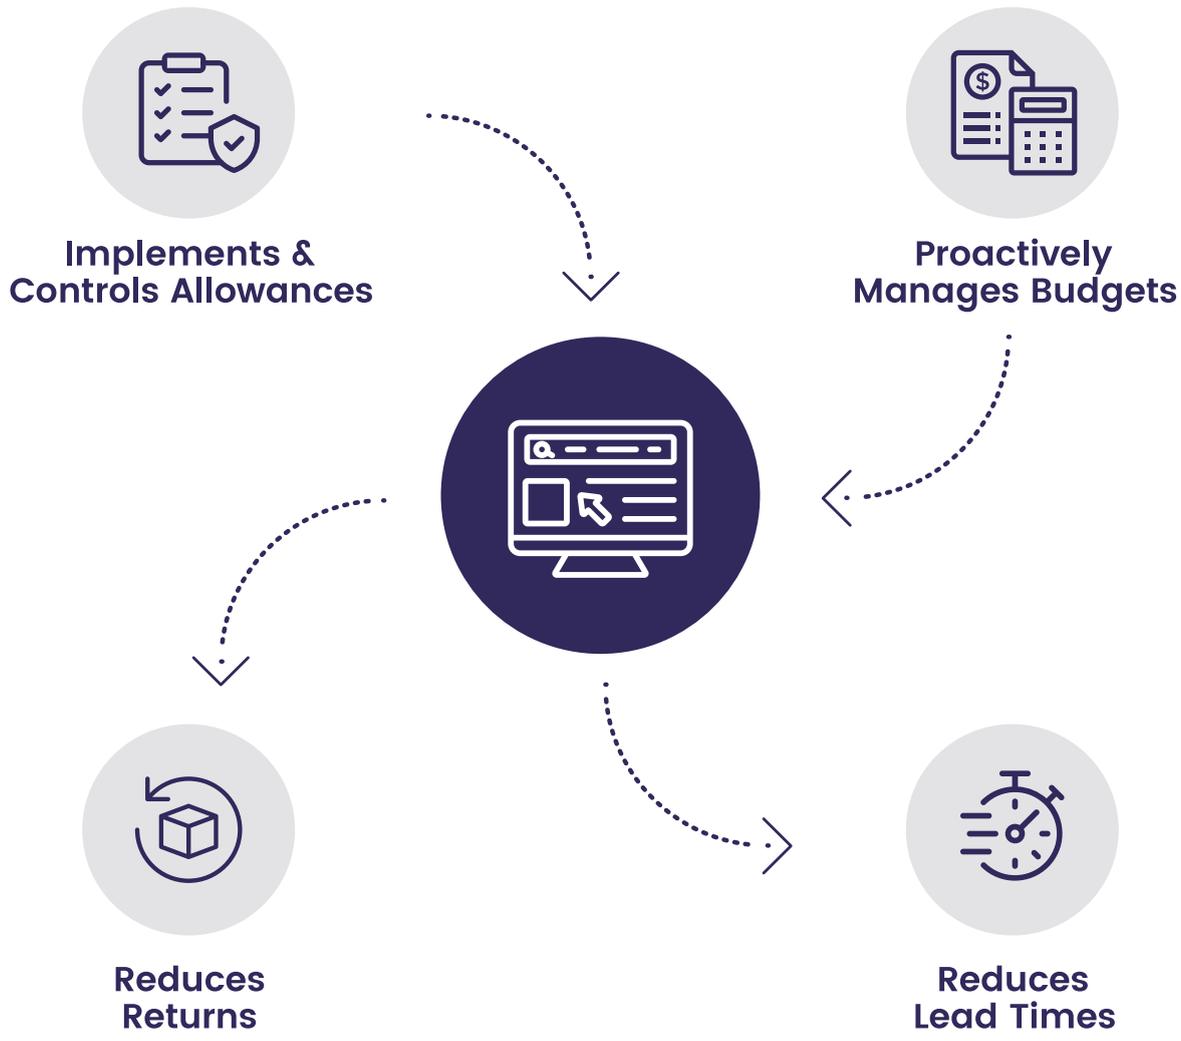

Utilising web portals, bespoke B2B platforms, bar coding systems and the like allows us to provide simplistic, time and money saving solutions to suit today's fast moving world.

B2B Customer Portal

Our customer portal is a game-changer when it comes to uniform management.

This web-based platform is specifically designed for the uniform industry and makes the procurement of PPE, workwear, and uniform a pain-free experience. With our portal, employees get access to a robust and easy-to-use system, while the management team gets full control, visibility, and real-time access to data for the large numbers of orders across the business.
